

Fandy Ramadhan

Senior Product Designer · UI, Motion & AI-Assisted Frontend

Depok, Indonesia +62 896-3614-1858 fandyramadhan1999@gmail.com fandyramadhan.com
linkedin.com/in/fandyramadhan dribbble.com/fandyramadhan behance.net/fandyramadhan2

PROFESSIONAL SUMMARY

Senior Product Designer with **7+ years** shipping SaaS and mobile products end to end across design, motion, and frontend code. Proven track record of delivering revenue-generating apps and internationally recognized work, including **MEFFYS Award 2026 Top 3 (Barcelona)** and **Google Play Best App for Good 2022**. Specialized in product design, design systems, SaaS motion graphics (After Effects, Lottie), and production-ready React/Tailwind frontend. Accelerates iteration cycles from weeks to days with an **AI-assisted workflow** powered by Claude, Gemini, ChatGPT, Figma Make, and Cursor for research, design exploration, and slicing. Collaborates effectively as a senior hire, freelance designer, or project partner, with a bias toward measurable outcomes.

Claude AI (Anthropic), Gemini (Google), ChatGPT (OpenAI), Figma, Figma Make (AI), Cursor AI, Maze, Protopie, Adobe XD, VS Code, Miro, AI-Assisted Design Workflow, AI-Assisted Coding

Domains

SaaS, Mobile Apps, Health Tech, EdTech, Fintech, Sports Tech, AI Products, Enterprise Dashboards, E-commerce, Landing Pages, Environmental Tech

PROFESSIONAL EXPERIENCE

Senior Product Designer

Sep 2025 — Present

Linkit360 — SaaS & Mobile Products Company, Indonesia

- Lead end-to-end product design for multiple SaaS and mobile applications serving thousands of users and generating recurring subscription revenue
- Designed **Lulladreams** , an AI Voice Cloning bedtime story app, which earned **Top 3 at MEFFYS Award 2026 in Barcelona** , an international recognition for mobile services innovation
- Architected a scalable **design system with 40+ reusable components** in Figma and React/Storybook, adopted across 5+ product teams, reducing UI development time by approximately 45%
- Created SaaS motion animations and micro-interactions using **Adobe After Effects and Lottie** , elevating product feel from functional to premium
- Designed **Speakeasy** (AI-powered language learning), **Booksnap** (TikTok-style audiobook with AI Q&A), and **Kimee** (AI-powered educational platform for kids aged 3 to 8), all shipped to production
- Mentored 2 junior designers on design thinking, Figma best practices, and design system contribution workflows
- Integrated **AI-assisted workflow** (Claude, Gemini, ChatGPT, Figma Make) into research synthesis, design exploration, and frontend slicing, reducing iteration cycles from weeks to days

UI Engineer (Design + Frontend Hybrid)

Sep 2023 — Aug 2025

Linkit360

- Held a hybrid design and engineering role, bridging the gap between design intent and code implementation across multiple SaaS products
- Built production-ready UI components in **React and Tailwind CSS** , translating Figma designs into pixel-perfect, responsive frontend
- Designed **Fantasy Eleven** , a PWA fantasy football platform that generates active contest revenue and sustains 300% peak traffic during live match days
- Produced motion explainer videos that accelerated B2B client onboarding by roughly 3 times compared to written documentation
- Collaborated closely with product managers and backend engineers, contributing to component library maintenance and UI quality across product portfolio

Freelance Product & UI/UX Designer

Jan 2022 — Present

Independent / Selected Freelance Clients

- Selected freelance engagements across health tech, fintech, and SaaS, running the full process from brief, research, and design, to final delivery
- Designed **Auto Health Care** for **Keluarga Sehat Hospital Group (Pati)**, an internal enterprise dashboard with 12+ modules monitoring hospital health programs, reducing missed patient follow-ups by 65% and shortening staff onboarding from 2 weeks to 2 days
- Designed **Criptofy** , a premium crypto trading landing page with dark mode fintech aesthetic, delivered on a 2-week timeline as a solo UI/UX Designer working alongside a PM and engineer
- Self-initiated **Q-Fast** as a portfolio project demonstrating end-to-end capability from product design and After Effects motion video to React/Tailwind frontend slicing in a single deliverable
- Create design-related content on social media platforms, sharing process, insights, and community education

UI/UX Designer

Jul 2021 — Sep 2023

Codehouse — Digital Agency, Indonesia

- Delivered UI/UX design across **15+ client projects** covering jewelry e-commerce websites, beauty brand platforms, mobile applications, and general digital products typical of agency work
- Translated client briefs into wireframes, high-fidelity UI, interactive prototypes, and developer-ready handoff documentation
- Conducted user research (interviews, surveys, usability testing) to validate design decisions, improving task completion rates by an average of 30% across projects
- Collaborated with cross-functional teams of engineers, product managers, and client stakeholders to deliver projects on time and within scope

UI/UX Designer

Feb 2022 — May 2022

Bicarakan.id — Online Counseling Platform

- Designed core experiences for a mental health counseling app connecting users with professional psychologists through chat and voice call sessions
- App was selected as **Google Play Best App for Good 2022**, chosen from millions of apps for its positive social impact
- Informed UX decisions by psychology consultations: calming color palettes, visual mood selectors, and pressure-free interaction patterns that reduced user anxiety and improved booking conversion

UI Designer

Feb 2022 — Jul 2022

Suitmedia — Digital Agency (Enterprise Clients)

- Designed enterprise-scale interfaces for large clients, working within established design systems and brand guidelines
- Delivered high-fidelity mockups and interactive prototypes for web and mobile projects under tight agency deadlines

User Experience Designer

Jan 2021 — Jan 2022

PT Abbauf Mulia Konsultan Teknologi — Software House

- Worked as a UX Designer in a software house, handling multiple client products across environmental, commodity, and sustainability sectors
- Designed **Earthqualizer**, a web platform for environmental conservation, sustainable landscape management, and commodity supply chain transformation, covering stakeholder flows from field monitoring to dashboard reporting
- Established UX processes for web and mobile projects: user flows, wireframes, and usability testing, ensuring consistent quality across deliverables

UI/UX Designer

Jun 2020 — Jan 2021

Herd Designer — Freelance Design Studio

- Designed interfaces for multiple freelance clients, managing projects from briefing to final delivery
- Developed expertise in responsive web design and mobile-first UI patterns

Frontend Developer & UI Designer

Jun 2018 — Jun 2020

PT Ritel Global Solusi & IMP Studio

- Built responsive websites using HTML, CSS, and JavaScript, serving as the technical foundation for my current ability to bridge design and engineering
- Designed and coded **Oke Garden** (garden services platform) as the first designer and frontend developer on the project, a startup still active today with thousands of users
- This experience enables me to slice my own designs into production code, communicate fluently with engineers, and ship faster than design-only roles

SELECTED PROJECTS & IMPACT

Lulladreams — AI Bedtime Story App

MEFFYS 2026 Top 3

Linkit360 · 2025

AI Voice Cloning app that lets parents, caregivers, and loved ones narrate bedtime stories with their own recorded voice, creating a screen-free storytelling experience. Revenue-generating product that reached Top 3 at MEFFYS Award 2026 in Barcelona. Active in Indonesian, English, French, and German. Role: Senior Product Designer, leading voice recording UX, subscription dashboard, and child-friendly player.

Bicarakan.id — Mental Health Counseling App

Google Play Best App 2022

Bicarakan.id · 2021

Selected as Google Play Best App for Good 2022 for positive social impact, connecting users with professional psychologists through chat and voice call sessions. Designed the end-to-end counseling experience with psychology-informed visual patterns (calming palette, visual mood selector, pressure-free flow) that increased session booking by 80% and held 72% 30-day retention. Still active on Google Play Store.

Q-Fast — Virtual Queue Management SaaS

Portfolio Project

Self-Initiated · 2026

Self-initiated portfolio project demonstrating a rare end-to-end capability in a single deliverable: product design, After Effects motion video, and React/Tailwind frontend code. Models a virtual queue experience that reduces customer wait time by 70% and improves staff queue throughput by 45% in scenario testing. Showcases velocity and hybrid craft that few individual contributors can demonstrate in isolation.

Speakeasy — AI-Powered Language Learning App

Linkit360 · 2025

Language learning platform combining structured lessons, film clips, song lyrics, AI tutor chat, and community support. Revenue-generating with active subscriptions. Shipped personalized learning paths, interactive video and lyric players, and gamification (XP, streaks, challenges). Average daily learning session time increased 85% after launch. Role: Senior Product Designer, with Figma Make and Gemini used to accelerate layout exploration across levels.

Kimee — AI Educational Platform for Kids

Linkit360 · 2026

AI-powered platform for children aged 3 to 8 covering five core domains: Math & Logic, Literacy & Language, Creativity & Expression, Social-Emotional Learning, and Life Skills. Freemium model with monthly, 6-month, and annual subscriptions. Dual persona design serves children and parents in one product, with an AI assistant (Sparky) summarizing progress. Claude, Gemini, and Figma Make used end to end for pedagogy research, content synthesis, and parallel UI exploration.

Booksnap — TikTok-style Audiobook Experience

Linkit360 · 2025

Mobile-first reading companion delivering bite-sized book summaries in a TikTok-style vertical scroll. Discovery rate increased 4x and browsing duration increased 60% compared to traditional list views. AI Q&A assistant integrated inside summaries so readers can ask questions directly about a book's content.

Auto Health Care — Hospital Program Monitoring Dashboard

Freelance

Keluarga Sehat Hospital Group · 2024

Freelance engagement for Keluarga Sehat Hospital Group in Pati: a 12+ module enterprise hospital health program monitoring solution covering patient registration, follow-up broadcasts, and medical queueing. Reduced missed patient follow-ups by 65% and shortened staff onboarding from 2 weeks to 2 days via a role-based dashboard (admin, doctor, nurse) with flat information architecture.

Fantasy Eleven — Fantasy Football PWA

Linkit360 · 2025

PWA platform for football fans featuring match predictions, fantasy team building, quizzes, and coin-based rewards. Revenue-generating with 300% peak traffic on match days. Started with an informative landing page that explains features and benefits, then routes users into the application via a clear Join Now CTA.

Earthqualizer — Environmental Conservation Platform

via Abbauf Mulia Konsultan Teknologi · 2021

Web platform for environmental conservation, sustainable landscape management, and commodity supply chain transformation. Designed stakeholder-facing flows from field monitoring to dashboard reporting, in collaboration with a software house team serving sustainability and commodity sector clients.

Criptofy — Premium Crypto Landing Page

Freelance

Freelance · 2022

Two-week freelance engagement designing a premium crypto trading landing page with dark mode fintech aesthetic. Delivered hero, simplified trend chart, trust signals, and strong typographic hierarchy that guided visitors from headline to CTA.
